

United HealthCare Provider & Hospital Search

If you are currently a United Healthcare member, you can create your account on www.myuhc.com and you will be able to see your network information based on your current plan.

If you are not currently enrolled in a United Healthcare plan, please follow the instructions below to search for providers.

Visit www.myuhc.com

In the middle of the page, click on “Find a Provider”

Click on “Medical Directory” or “Behavioral Health Directory”

Click on “Employer and Individual Plans”

It may ask you if you are a member or shopping around. If you are not currently enrolled with UHC, or if you want to compare the two network options, click on “shopping around” so that the system does not take you to your current network.

Choose the network you are searching: “Choice Plus” or “Core”

The system may indicate a location that is not close to you. Click on “Change Location” and enter your zip code or city to update location.

You may perform your provider search from here.
